

LDP Binary Analyser App.

100 10 25 50 75 ODD/EVEN MATCH/DIFFERS

4 3 5 9 1 0 6 1 6 0 5 4 2 7 4 7 2 4 7 2

In the application of LDP ANALYZER.
The most important to know are the COLORS and the WORM.
The numbers are useless.

The colors are divided into 2 parts : Blue and red.

The worm has 3 parts :
The blue point, the red point and the green point.

The blue point is resistance.
The red point is the support.
The green point is the movement that leads to the point of resistance and the point of support.

HOW TO TAKE A POSITION FROM LDP ANALYZER ?

RISE

CONDITION
13 OR 15 RED
LOWER TREND (LOWER WORM)

Here the worm goes down.
It's a downtrend.
In this situation the tendency wanted to go up, but could not.
This is why there is less blue color.
The 3 blue colors indicate that in the next movement it will be an increase.
To make your decision, you will start counting the reds.
Here you have 15 reds.
When you have 15 reds with a worm going down.

You open a position UP.

RISE

CONDITION
4 OR 5 RED + 1 BLUE
TREND LINE (HIGH WORM)

Here the worm goes up and go down a little.
It's a trend line.
In this situation the trend is rising.
This is why there is more blue color.
The 1 red colors between blue indicate two high movement.
To make your decision, you will start counting always the reds.
Here you have 5 reds and 1 blue.
When you have 5 reds and 1 blue with a worm going down.

You open a position UP.

FALL

CONDITION
4 OR 5 OR 6 RED + 1 BLUE
RANGE (IRREGULAR WORM)

Here the worm goes up irregularly and go down.
It's a range.
In this situation the trend is irregular.
The 3 blue colors indicate high movement but the worm goes down to break the support.
To make your decision, you will start counting always the reds.
Here you have 4 reds and 1 blue.
When you have 4 reds and 1 blue with a worm going down.

You open a position DOWN.

GOOD LUCK AND GOOD TRADE!
