

# INDEX 10 UPDATE STRATEGY

INDEX 10

THIS STRATEGY IS ONLY FOR VOLATILITY 10 INDEX

The martingale does not exist. Be careful what you do.

Firstly  
must recognize this price table

7,308.004

7,308.004  
The price

Digits which allow  
the evolution of the price

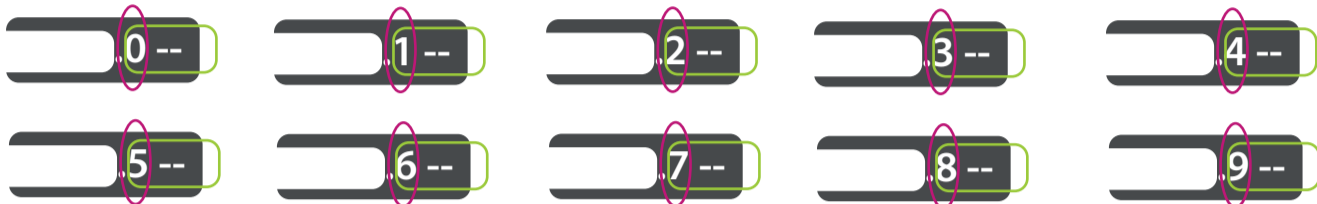

7,308.004

In the strategy of index 10 UPDATE, you will focus only on the  
Digits which allow the evolution of the price

7,308.004

The first of the 3 numbers that will give the signal

Secondly  
You will remember the digits like this

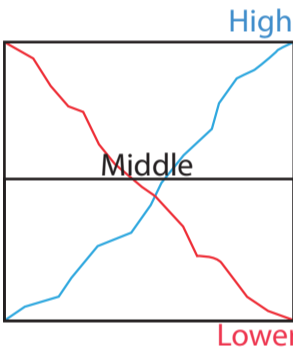

Thirdly  
How to recognize the signal, It's simple

You just need to have 1 digit that repeats 2 times in the progress of the prices evolution.

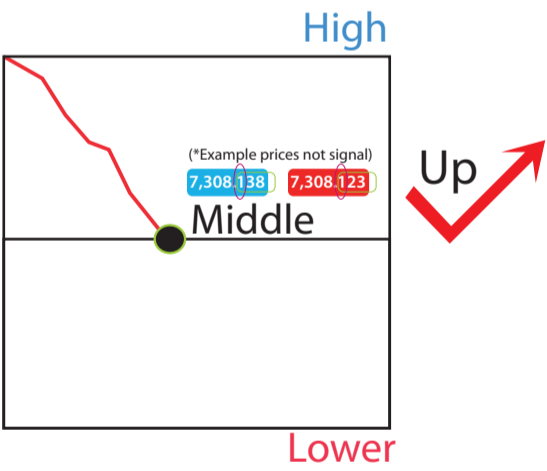

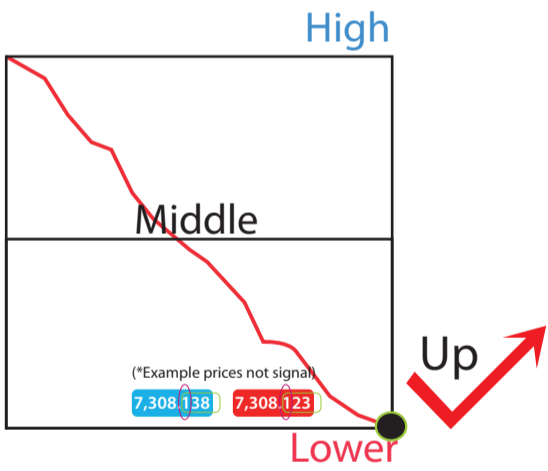

Example : 7,308.138 7,308.123

Lastly  
How to take position

TABLE MOVEMENT WORM

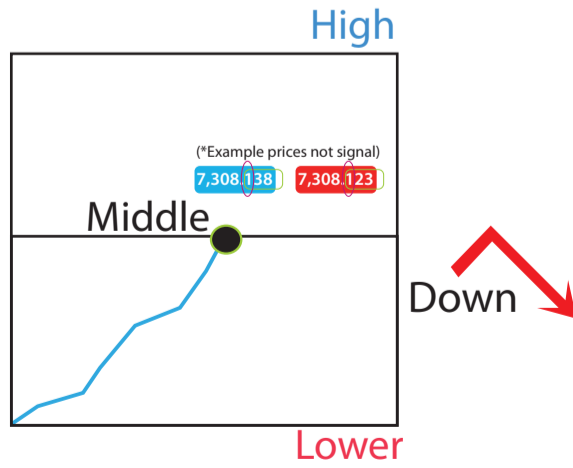

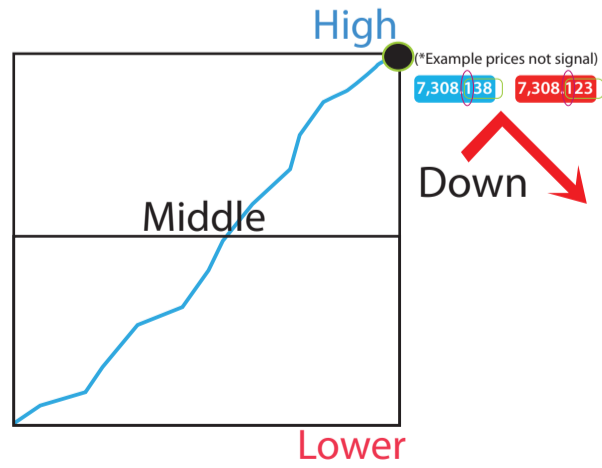

RISE

If you spot the digit 1 2 times  
Take position RISE  
\*Check the movement of the worm.

If you spot the digit 1 2 times  
Take position RISE  
\*Check the movement of the worm.

FALL

If you spot the digit 0 2 times  
Take position FALL  
\*Check the movement of the worm.

If you spot the digit 0 2 times  
Take position FALL  
\*Check the movement of the worm.

Make 2 or 3 operations per day. Do not exceed this limit.
